

Ramin Mahmoudi | Reference Letters

Mechanical Engineer

Espoo, Finland (Willing to relocate and travel) | +358 44 230 8583 | aboutramin@gmail.com | linkedin.com/in/aboutramin

This portfolio compiles signed recommendation letters from academic and industrial referees. Letters are included as provided by referees and are not altered.

Referee	Affiliation	Context / Relationship	Section
Siim Jäger	Karl Storz	Head of Plastics Processing; supervised MSc thesis (AM tooling for low-volume micro-injection molding)	Letter 1
Prof. Mika Salmi	Aalto University	Assistant Professor; thesis supervision and academic performance summary	Letter 2
Dr. Ferdinand Bammer	TU Wien	Supervisor during Research Assistant role (optical measurement setups, automation, lab workflows)	Letter 3
Dr. Juha Huuki	Aalto University	University Lecturer; course performance (top 5%) and academic recommendation	Letter 4
Prof. Juhani Orkas	Aalto University	Course instructor (advanced casting/simulation) and academic recommendation	Letter 5

Notes: **(1)** All letters are included exactly as provided by the referees and have not been edited. **(2)** This document is compiled solely for application convenience.

Letter of recommendation

27.01.2026

To Whom It May Concern,

I am writing to highly recommend Ramin Mahmoudi for doctoral programs and professional engineering positions. In my capacity as Head of Plastics Processing Department at Karl Storz Video Endoscopy Estonia OÜ, I supervised Ramin during his Master's thesis project, which was carried out in close collaboration between our company and Aalto University. Over the course of this project, I gained a clear and detailed view of his technical abilities, analytical thinking, and potential as a future researcher.

Ramin's thesis, titled "Additively Manufactured Photopolymer Mold Inserts for Low-Volume Micro-Injection Molding", addressed rapid tooling opportunities and challenges using additive manufacturing technologies. His ability to quickly understand complex industrial challenges, independently design experiments, and interpret results with scientific rigor was impressive. In particular, his work on researching additive manufacturing possibilities in the field of injection molding tooling demonstrated both strong engineering fundamentals and genuine scientific curiosity.

One of Ramin's notable strengths is his ability to bridge academic research with real industrial needs. Throughout the project, he consistently proposed practical, data-driven solutions that added value to our production and development teams. His documentation was precise and clear, and his communication skills allowed him to present findings effectively to both engineers and management.

Beyond his technical competence, Ramin is highly motivated, reliable, and exceptionally proactive. He required minimal supervision and displayed a level of independence and critical thinking. These characteristics, combined with his strong theoretical foundation, make him an excellent candidate for PhD studies.

I strongly believe that Ramin has the potential to contribute meaningfully to scientific research and to excel in a demanding doctoral environment. I give him my highest recommendation for admission to your PhD program. Should you require any additional information, I will be happy to provide it.

Sincerely,

Siim Jäger, MSc
Head of Plastics Processing Department

Reference Letter – Ramin Mahmoudi

Ramin Mahmoudi was a master's degree student in the Master's Program in Manufacturing (EIT Manufacturing Master School) at Aalto University. His Major was Additive Manufacturing for Full Flexibility

He has very good study records, with an average grade of 4.68.
(Grade scale: 5 (excellent), 4 (very good), 3 (good), 2 (satisfactory), 1 (passable), 0 (fail))

His thesis topic was Additively manufactured photopolymer mold inserts for low-volume micro-injection molding with a grade 5.

Espoo 26.1.2026

Mika Salmi, D.Sc. (Tech.)
Assistant Professor, Aalto University, Department of Mechanical Engineering
Research Director, Aalto University Digital Design Laboratory
P.O.Box 14200, FI-00076 Aalto, Finland
Visiting address: Puumiehenkuja 3, Espoo

To Whom It May Concern

I am pleased to recommend Mr. Ramin Mahmoudi, whom I supervised during his work as a research assistant at the Institute of Production Engineering and Photonic Technologies at TU Wien (Vienna University of Technology).

Ramin impressed me with his technical skills and his ability to work independently. He translated experimental objectives into reliable and repeatable measurement setups. As part of his responsibilities, he integrated optical, mechanical, and automated elements into effective laboratory workflows. He worked with minimal supervision and took full responsibility for the implementation and validation of experiments. I could always rely on him to deliver high-quality results on time.

His work included setting up and operating optical measurement experiments; configuring and aligning components such as lenses, cameras, and laser-based elements; preparing experimental samples; and designing custom fixtures to improve alignment stability and reproducibility. In addition, he developed a motor-driven linear motion mechanism to automate sample positioning, which improved process control and reduced operator dependence.

Ramin approaches research with a highly structured mindset. He was careful in his experimental work, documented everything systematically, and paid close attention to calibration and repeatability. He also performed valuable data analysis and presented his findings clearly, including through visualizations.

What distinguishes Ramin is his strong wish to really contribute to the given goals. For this he goes the extra mile and he finally succeeds.

I recommend Mr. Mahmoudi without reservation for doctoral studies or research-oriented positions in academic or industrial settings. I am confident he will be a valuable and reliable contributor to any advanced research program.

Vienna, Jan. 28th, 2026

With best regards

Privatdozent Dr. Ferdinand Bammer

Mr. Ramin Mahmoudi is studying as a master's degree student in Aalto University School of Engineering, Degree Programme in Mechanical Engineering.

Mr. Ramin Mahmoudi has been showing very good performance in studies. He has successfully completed Production Engineering, 5 cr course in the autumn 2023 Aalto University. He completed the course with grade 5=excellent (scale 0 - 5) and he belong top 5 % of the course.

Mr. Ramin Mahmoudi has achieved a pass with distinction in the NC-exam for Manufacturing Methods 2.

Mr. Ramin has shown genuine dedication, ability to apply academic knowledge in practice, and capability to work independently on complex tasks. I warmly recommend Mr. Ramin Mahmoudi for any position or educational opportunity he seeks.

Yours faithfully

In Otaniemi, Finland, 28th of January 2026

University lecturer Juha Huuki

To Whom It May Concern,

I am writing to recommend Ramin Mahmoudi, born 13 October 1990. I am emeritus professor at Aalto University, School of Engineering and Ramin Mahmoudi was my student in "Advanced Casting Technology" course. He got the grade 5, excellent from that course. As a student, Ramin Mahmoudi was always active and innovative. During his time in my class, he specialized in material selection, cast component and mold design and to conduct analyses and simulations.

Ramin Mahmoudi is a very innovative person and I recommend him further doctoral studies. Should you have any further questions about him, feel free to reach me.

Tampere 28.1.2026

Sincerely,

Juhani Orkas
Emeritus Professor, D.Sc.(Tech.)
Aalto University
Department of Mechanical Engineering
Foundry Engineering
